DATA SCIENTIST - leveraging +4 years of experience

Data Scientist with 4+ years of experience architecting technology solutions to increase efficiency, accuracy, and utility of internal data processing. Experienced at creating data regression models, using predictive data modeling, and analyzing data mining algorithms to deliver insights and implement action-oriented solutions to complex business problems

PROFILE SUMMARY

- Proficient in mining and analyzing data from company databases to drive optimization and improvement of product development, marketing techniques and business strategies.
- Highly skilled in using predictive modeling to increase and optimize customer experiences, revenue generation, ad targeting and other business outcomes.
- Skilled in coordinating with different functional teams to implement models and monitor outcomes.
- Adept in developing processes and tools to monitor and analyze model performance and data accuracy

CORE COMPETENCIES

- Data Analysis
- Data Visualization
- Machine Learning
- Quantitative Analysis
- Statistics
- Modelling

PROFESSIONAL EXPERIENCE

ICS , Pune

Apr. 2019 – Present

Data Scientist

- Develop action plans to mitigate risks in decision making while increasing profitability by leveraging data science.
- Drive the interaction and partnership between the managers to ensure active cooperation in identifying as well as defining analytical needs and generating the pull-through of insights with the business.
- Develop algorithms using Natural Language Processing and Deep Learning Models for predictive maintenance
- Build predictive models using various machine learning tools to predict the possibility of equipment failure.
- Demonstrate knowledge and execution of application programming interface development and test automation
- Design algorithms to track and detect anomalies in multiple sensors data for the industry

NatWest Group, Pune

Dec 2017- Mar.2019

Data Scientist

- Integrated all stages of design, build, analysis, coding, testing, and integration of structured and unstructured to deploy a new data and analytics platform for 3D design of orthotics and prosthetics (O&P).
- Developed new business intelligence capabilities through sourcing, loading, synthesizing, and reporting new metrics and analytics and develop sustainable maintenance processes.
- Assured designs and project activities in compliance with data policies, architecture, security and quality guidelines and standards.
- Drove innovation and integration of new technologies into organization with wide projects and activities.
- Lead maintenance and adaptation of existing tools and reports to support business management processes and performance management.

ACADEMIC CREDENTIALS

- [Bachelor's of Science in Computer Science](#) | [Kurukshetra University](#) | 2017

Certificates: IBM Data Science- Coursera Certificate | Google Certified Professional Data Engineer – GCP | Microsoft Professional Program Certificate in Data Science | Deep Learning - Coursera Certificate

Technical Skill: Python , R , SQL , Java , Julia

PERSONAL DOSSIER

- **Languages Known :** English & Hindi
